#### **Federal Communications Commission**

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radiofrequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

#### Warning

This is a class A product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

This Class A digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

#### Caution

Risk of Explosion if Battery is replaced by an Incorrect Type. Dispose of Used Batteries According to the Instructions.

#### **Remote Control Battery Safety Information**

- Store batteries in a cool and dry place.
- Do not throw away used batteries in the trash. Properly dispose of used batteries through specially approved disposal methods.
- Remove the batteries if they are not in use for long periods of time. Battery leakage and corrosion can damage the remote control. Dispose of batteries safely and through approved disposal methods.
- Do not use old batteries with new batteries.
- Do not mix and use different types of batteries: alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium).
- Do not dispose of batteries in a fire.
- Do not attempt to short-circuit the battery terminals.

# WARNING

- To reduce the risk of fire or electric shock, do not expose this appliance to rain or moisture. Warranty will be void if any unauthorized modifications are done to the product.
- Do not drop the camera or subject it to physical shock.
- Use the correct power supply voltage to avoid the damaging camera.
- Do not place the camera where the cord can be stepped on as this may result in fraying or damage to the lead or the plug.
- Hold the bottom of the camera with both hands to move the camera. Do not grab the lens or lens holder to move the camera.

# **Audio Input Connection**

Connect the audio device for audio receiving.

### [Notes]

- Line input level: 1Vrms (max.).
- Mic input level: 50mVrms (max.); Supplied voltage: 2.5V.

# **Video Output Connection**

#### • HDMI

Use the HDMI cable to connect with monitor or TV for video output.

#### • 3G-SDI

Connect to 3G-SDI monitor for video output.

#### [Notes]

- HDMI and 3G-SDI monitors can be connected to camera and output live video simultaneously. When the HDMI monitor is well connected before the camera is turned on, the OSD menu will be displayed on HDMI monitor as default.
- The model name with "H" do not have 3G-SDI.

# **Cable Fixing Plate Installation**

 Secure the cable fixing plate to the camera. Screws: 3 M2 x 4mm screws (included in the package).

# **Ceiling Mount Installation**

1. Secure the mount bracket on the ceiling. 2. Install the mount bracket on the camera. Screw: 4 screws, M4 x 10mm (Not Screw: 2 screws, 1/4"-20 L=6.5mm Included in the package) (Included in the package) 1900 V 3. Slide the mount bracket with the camera 4. Secure the camera with screws. into the mount bracket which secured on Screw: 3 screws, M3 x 6mm (Included in the ceiling. the package) **~** \*\*\*\*\*\*\*\*\*\*\*\* [Notes] Connect necessary cables after sliding the camera into the mount bracket.

# **Camera Installation**

- Angle A: less than 30°
- Height B: 2~3m from floor
- Distance C: longer than 3m away from podium
- Position: center of classroom
- Distance between the camera and tracking target (presenter):

Optical zoom ratio ability	Upper body size	Full body size
12X	3~16m	3~28m
16X	3~30m	4~55m
21X	3~40m	4~65m
30X	3~44m	3~76m

### **Remote Control**

Nan	ne	Function
1	Power	Turn the camera on/standby.
2	Menu	Press the button to open OSD menu during HDMI output.
3	Camera Select	Set cameras to <b>CAM1</b> to <b>CAM3</b> button. Select a camera to operate.
4	Number Pad	<ul> <li>Set the preset position 0~9.</li> <li>Press number button (0~9) to move the camera to pre-configured preset position 0~9.</li> </ul>
5	Preset	Press and hold <b>Preset</b> , then short press <b>Number button (0~9)</b> , and then release both buttons to save the preset position.
6	Reset	Press and hold <b>Reset</b> + short press <b>Number button (0~9)</b> , and release all to reset preset position.
7	WDR	Turn on/off Wide Dynamic Range function.
8	BLC	Turn on/off Backlight Compensation.
9	▲,▼,◀,&►	Press once for incremental movement or press and hold for continuous pan or tilt.
10	Enter	Access the OSD menu, confirm the selection or make a selection in OSD menu.
11	PT Reset	Reset the Pan-Tilt position.

Nam	ie	Function
12	L/R SET	<ul> <li>Invert L/R Pan Direction: Press and hold L/R SET, then short press Position 2, and then release both buttons.</li> <li>Reset L/R Pan Direction: Press and hold L/R SET, then short press Position 1, and then release both buttons.</li> </ul>
13	Far/Near/MF	Enable manual focus. Use Far/Near to adjust the focus.
14	Zoom +/-	Zoom in/out slowly.
15	Zoom Fast +/-	Zoom in/out fast.
16	Pan-Tilt Speed Fast/Slow	Pan-Tilt speed adjustment.
17	AF	Auto focus.
18	Auto Tracking	Auto Tracking ON/OFF.
19	Freeze	Freeze the live image.
20	EV +/-	<ul> <li>Short press to adjust EV level.</li> <li>Long press EV+ to turn on RTMP.</li> <li>Long press EV- to turn off RTMP.</li> </ul>
21	Switch	Change presenter.
22	Tracking Point	Press the button to enter Tracking Point (Preset Position 1).
23	Upper Body	Focus on the upper body of the presenter.
24	Full Body	Focus on the full body of the presenter.

# Set Up the Camera

### **OSD Menu**

You can use the supplied Remote Control to operate the OSD Menu during HDMI output. Press the (MENU) button to call out the On-Screen Display (OSD) menu and use the  $\blacktriangle$ ,  $\triangledown$ ,  $\triangleleft$ ,  $\blacktriangleright$  and  $\checkmark$  buttons to operate the OSD menu.

# **IP Address Setup**

#### **Static IP**

- 1. Press the (MENU) button on the remote control to call out the OSD menu.
- Go to Network > Static IP.
   [Notes] Turn the DHCP off before setting up static IP (Network > DHCP > Off).
- 3. Select the IP Address, Gateway, Netmask and DNS to configure. Press (↔) and use ◀, ► and Number Pad to enter the data.

Camera		11/1				
Video Output						
Network	DHCP	On				
Advanced Setting	Static IP		IP Address	192.168.1.168	<b>1</b> 92. 168. 001. 168

# Web Setup

Connect the camera from a remote site through the internet.

#### Access the Web Interface of the Camera

To access the camera Web interface, you have to use **AVer IPCam Utility** or **AVer PTZ Management** software to search camera IP address.

#### Access the Camera via AVer IPCam Utility

#### To use AVer IPCam Utility to find the camera IP address:

- Download the AVer IPCam Utility from <u>https://www.aver.com/Downloads/search?q=AVer%20IPCam%20Utility%20for%20Camera%20IP%</u> <u>20Searching</u> and launch the application.
- 2. Click Search to view all available devices on the screen.
- 3. Click to select a camera from the list to view the camera info in the Settings field.
- 4. The default network of the camera is Static IP (192.168.1.168) and default ID/Password are admin/admin. If you want to configure the network to DHCP, enter the ID/Password in the Login field, select the "camera model" on the list, select "DHCP" and then click the Apply button.

To access the Web interface, double-click on the IP address in the IPv4 Address column.
 For the first-time user, you will be prompted with a Login window to change the ID and password.

 Login with the new ID/Password, the Web interface of the camera will be displayed (Chrome browser). Please refer to <<u>Live View</u>> chapter for more details.

[Notes] If IPCam utility cannot find the camera, please check the following:

- Please make sure the Ethernet connection of the camera is well connected.
- The camera and PC (IPCam Utility) are in the same LAN segment.
## Accessing the Camera via AVer PTZ Management

Use AVer PTZ Management to find the IP address of your cameras, follow the steps below.

- 1. Download the AVer PTZ Management software from https://www.aver.com/download-center.
- 2. Download the Windows program and install it.
- Set up the user ID and password, and log in to the software (default User Name/Password: admin/admin).

A PTZ Mai	nagement	
Login		
	*	
	£	
La	gin	

- On the Main page of PTZ Management, click Setup > Add > click Auto Search. The cameras connected on the same LAN with the computer will be displayed.
- 5. Click on the camera and enter the camera ID and Password to add the camera to the device list (default ID/Password are **admin/admin**). Click **Go to Web** to access the camera web application.

# **Live View**

You can control the camera and operate the Preset functions using this page.

### **Camera Control**

Click the Camera Control tab to display the panel below for operation.

C	amera Contro	k		Preset						
				AF.		Pan Speed		16	Digital Zoom

				Continuous A	F ¥	High	Low		Preset Affects PTZ & Focus Values Only	

#### Pan-Tilt-Zoom Control

Use the directional buttons to navigate the camera view. Adjust the **Pan Speed** and **Tilt Speed** if necessary.

Use (and (a) to zoom in or zoom out the live image. You can also select **Zoom Speed** (**High/Low**).

Click to go back to home (default) position.

#### • Focus

Item	Description
Auto Focus	Click to perform the auto focus.
Manual Focus 🔤	Click to manually adjust the focus. You can use the <b>Focus +</b> and <b>Focus</b> – buttons to adjust the focus.
One-push Focus	Click to automatically adjust the focus right away.
Focus Near Limit	Set the focus distance limit.
	If Auto Focus is selected, you can further set up the AF Mode.
AF Mode	• Continuous AF: The camera will automatically adjust focus all the time.
	<ul> <li>AF Trigger after PTZ: The camera will automatically adjust focus each time after performing the pan, tilt or zoom functions.</li> </ul>

## • Digital Zoom

Item	Description
Digital Zoom	Select <b>On</b> or <b>Off</b> to enable or disable the function.
Digital Zoom Limit	Adjust the digital zoom from x2 to x12.
Relative Zoom Ratio	Turn on or off the function. If you turn on Relative Zoom Ratio, the pan/tilt speed will be automatically adjusted based on the zoom ratio. The more the zoom ratio, the slower the pan/tilt speed.
Preset Affects PTZ & Focus Values Only	Turn on this function to save only the value of pan, tilt, zoom and focus for the configured preset points.

## Preset

Click the **Preset** tab to display the panel below. You can edit and operate the preset positions.

Camera Control		Preset						
		Save Preset		Load Preset				
	Ð	0	Save	0		Load	Edit Scer	nes
		Video Freeze while Preset		Quick Call				
	Zoom			0	1	2	3	4
		Preset Accuracy		5	6	7	8	9
<b>•</b>	Q	Preset Speed	50	10	11	12	13	14
		5	200	15	16	17	18	19

#### To set up preset positions:

- 1. Go to Live View > Preset.
- 2. Use the directional buttons to navigate the camera view. Optionally use 🕘 and 🤤 to zoom in or zoom out the images.
- 3. Enter a preset number (0~255) in the Save Preset column and click Save to save the position.

#### To move camera to preset positions:

- 1. Enter a preset number (0~255) in the **Load Preset** column or click a preset number (0~19) in the **Quick Call** section.
- 2. Click Load, the camera will move to the preset position.

When operating the go to preset positions, you can optionally adjust the **Preset Speed** or turn on or off the **Video Freeze while Preset** function.

- Video Freeze with Preset: When you turn on this function, the camera will not display the view along the path when moving from one position to another. The camera will only display the view of the positions.
- **Preset Speed:** Drag the slider to adjust the moving speed from one preset position to another. (5~200)

#### To customize camera functions at each preset positions:

- 1. Go to Live View > Preset > Edit scenes.
- Click Scenes 0~9 to add up to 10 CGI commands (follow the format of <u>https://username:password@URL</u>) for each scene.
- 3. Select a Scene from the Scenes drop-down list to pair Preset 0~9 with Scene 0~9.
- 4. Click **Append** to add CGI commands, and click **Remove** to delete CGI commands. When finished, click **Save**.

# **Camera Settings**

## Exposure

Click the **Exposure** tab to display the panel below for configuration.

Exposure	Image Process				
Full Auto	Exposure Value				Slow Shutter
Iris Priority	-4				WDR
Shutter Priority	Shutter Speed		Gain Limit Level	24dB	Bright Value 19
Manual			24 💿	42	
Bright	Iris Level	F2 4	BLC	Off	
			Off	On	Default

Item	Description
Exposure Mode	Options include Full Auto, Iris Priority, Shutter Priority, Manual and Bright. Select an exposure mode and optionally adjust the value of Exposure Value, Gain Level, Shutter Speed, Gain Limit Level, Iris Level, BLC and Bright Value.
Slow Shutter	Select the checkbox to let more light enter the lens.
WDR	Select the checkbox to turn on Wide Dynamic Range mode for more vivid camera view.

Click **Default** to reset the **Exposure** settings to factory default.

## Image Process

Click the **Image Process** tab to display the panel below for configuration.

Exposure	Image Process							
White Balance			Saturation		Noise Filter

Input	srt://10.100.105.127:8889?mode=listener	
Input Format		
Reconnect Delay		10 S 🗘
	Use hardware decoding when available	
Defaults		OK Cancel

**[Notes]** If there is no image, please try right-click on the source->Transform->Fit to screen to re-scale image.

# **Tracking Settings**

You can set up the tracking modes and use the **Tracking Control** panel to perform the tracking function. You can also turn on Gesture control to use your hands to control certain camera functions.

Tracking Mode	Description
	Camera starts tracking when a presenter appears in the camera view. Select <b>Upper Body</b> for <b>People Size</b> , the
Presenter	camera will focus on the targeted presenter with less
	background. If the presenter is out of the camera view, the
	camera will return to the pre-configured Tracking Point.
Zana	Camera focuses on the pre-configured zones (preset areas)
Zone	while tracking the presenter.
	You can benefit from the advantages of both the Presenter
	and Zone modes. The camera will start tracking when a
Hybrid	presenter is detected in the camera view. If the position
	where a presenter enters is pre-configured as a tracking
	zone (preset area), the camera will activate as Zone tracking.

To perform the tracking function, you can:

- On the camera web application, click Tracking Settings to set the tracking modes.
- Go to Tracking Control panel > select from Presenter, Zone and Hybrid mode. Optionally click the Click Track button if you want to select a new target presenter to track.

Click the **Click Track** button, the target presenter will be highlighted with a red frame, while the other detected presenters will be highlighted with blue frames.

Click on the presenter with a blue frame, the camera will change focus to the presenter you click.

## **Presenter Mode**

Camera will start tracking when the presenter enters the camera live view.

Item	Description
Tracking Control	Click to turn on or off, and select a tracking mode.
Tracking Sensitivity	Drag the slide bar to adjust the sensitivity of the tracking function.
Tracking Point	Use the directional buttons, 🕣 and 🥥 to adjust the camera to a <b>Tracking Point</b> (preset position). Click <b>Save to Preset 1</b> to save the <b>Tracking Point</b> . When no one is in view, the camera will go back to the <b>Tracking Point</b> (preset position).
Time of Return to Tracking Point	Set the idle time (sec.) for the camera to return to the <b>Tracking Point</b> . Drag the slider to adjust the value.
People Size	Select to track the presenter in <b>Full Body</b> (entire body) or <b>Upper Body</b> (up to 60% of body).
Effective Tracking Area	Set up a tracking area (optional). When <b>Effective Tracking</b> <b>Area</b> function is on, the camera only tracks around the selected area. Select the checkbox to enable the function and click the <b>Set</b> , a red frame appears in the preview window. Drag the upper-left or the lower-right corner of the red frame to adjust the tracking area.

Auto Zoom	When <b>Auto Zoom</b> is off, the camera stops zooming in/out automatically but keep the zoom size based on the preset point selected from the drop-down list below.
Auto Tilt	Select the checkbox to turn on the Auto Tilt function.
Multi-Presenter Detection	When more than one presenter is detected, the camera will zoom out to frame every presenter in the camera view. To set up Multi-Presenter Detection, please refer to < <u>Configuring</u> <u>Multi-Presenter Detection</u> >.

#### **Configuring Multi-Presenter Detection**

Set up a preset position for Multi-Presenter Detection. Ensure the camera view of this position fully covers the area where multiple presenters may appear. This preset position will be triggered when multiple presenters are detected.

To set up the preset position, go to Live View > Preset.

#### To configure Multi-Presenter Detection:

- Go to Tracking Settings > Presenter setup page > select a pre-configured preset position (e.g. Preset 3) from the Multi-Presenter Detection drop-down list to turn on Multi-Presenter Detection function. Presenters appearing within the current camera view will trigger the Multi-Presenter Detection.
- Drag the slider of Time of Return to Tracking Point to adjust the duration when the camera loses track of the detected presenters and moves back to the selected preset point. By default, the dwell time set up with 3 second.

Presenter	Zone	•	Hybrid	I	Ges	ture Beta	
Tracking Sensitivity		Tracking Point			Multi-Prese	enter Detection

		Preset 1		~	·		

- When the Presenter tracking function is on, the Multi-Presenter Detection will be activated. To turn on the Presenter tracking, please refer to <<u>Tracking Settings</u>>.
- 4. To turn off the **Multi-Presenter Detection** function, go to **Tracking Settings** > **Presenter** setup page > select **Off** from the **Multi-Presenter Detection** drop-down list.

Multi-Presenter Detection will be triggered

Preset Position bundled with Current Camera View Multi-Presenter Detection

Multi-Presenter Detection will not be triggered

Preset Position bundled with Current Camera View Multi-Presenter Detection

For example, when there is one presenter detected, the camera will perform single-presenter tracking, in which the camera view will focus on the presenter.

Meanwhile, when there is another presenter appears within the current camera view and then detected by the camera, the camera will be triggered to the pre-configured preset position.

You can also use the supplied Remote Control to quickly set up the Presenter Mode.

- 1. Adjust the camera view properly and then save to preset 1 as the initial position.
- 2. Press Auto Tracking ON to turn on the function.
- 3. Press **Upper Body** to track the presenter with a closer view (up to 60% of body), or **Full body** to track the entire presenter in the view.
- 4. Press **SWITCH** to switch between presenters. Initially the camera tracks the one who is in the center of view. Every switch follows the sequence: left to right, then back to far left one in the camera view (see picture below).
- To see which presenter is being tracked, press and hold FREEZE button to call/cancel engineering mode while tracking, you will see the tracked presenter is framed with a green box (Only during HDMI output).

## Zone Mode

Set up the block areas for the camera to detect the presenter and track the presenter when the presenter appears within the pre-configured areas (preset areas).

#### To configure the preset areas:

- 1. Select the block number (2 Blocks, 3 Blocks or 4 Blocks) you want to configure for the preset positions. You can set up to 4 preset positions.
- 2. Select a preset number from the drop-down list (Preset 6 ~ 9).
- 3. Use the directional buttons,  $\bigoplus$  and  $\bigoplus$  to move the camera to the desired position.
- Click Save to save the position to the selected preset number. A preset thumbnail will be displayed below the preview window.

**[Notes]** To ensure smooth transition while tracking the presenter, please OVERLAP the set up preset areas. Do not separate the preset areas.

Ensure to overlap the preset areas

Do not separate the preset areas

Set up the preset view to clearly see the preseter at least complete half body (60% upper body) to ensure tracking accuracy. Make sure there is no any other human-outline poster/TV/moniter in the background. The result of the **Zone Mode** is illustracted as below.

#### 1. Adjust the value or turn on the functions below.

Item	Description
Tracking Sensitivity	Drag the slider to adjust the sensitivity of the tracking function.
Tracking Point	When losing tracking target, the camera will go back to the <b>Tracking Point</b> (preset position). To set up the <b>Tracking Point</b> , refer to step 1.
Time of Return to Tracking Point	Set the idle time (sec.) for the camera to return to the <b>Tracking Point</b> . Drag the slider to adjust the value.

- You can also use the supplied Remote Control to quickly set up the Zone Mode. Press the Auto Tracking "On" button to turn on tracking function. Long press Tracking Point to switch tracking mode from Presenter Mode to Zone Mode (the hotkey supported at firmware v0.0.0000.21 or later).
- 3. By default, **2 Blocks** has initially selected if you use the Remote Control to set up the **Zone Mode**. If you want to configure more blocks, you will have to use the Web interface for setup.
- 4. Adjust the camera view properly and then save to preset 6 and preset 7. By default, preset 6 is initially selected to be the first position to set up.

## **Hybrid Mode**

You can benefit from the advantages of both the **Presenter** and **Zone** modes. The camera will start tracking when a presenter is detected in the camera view. If the position where a presenter enters is preconfigured as a tracking zone (preset area), the camera will activate as Zone tracking.

Set up a **Tracking Point**. When losing tracking target, the camera will go back to the **Tracking Point** (preset position).

#### To set up the Tracking Point:

- 1. Select Preset 1 from the drop-down list.
- 2. Use the directional buttons,  $\bigoplus$  and  $\bigoplus$  to adjust the camera view.
- 3. Click Save to save this preset point as the Tracking Point.

To better perform the **Hybrid Mode**, DO NOT overlap the zones (preset areas) nor configure the zones close to each other. It's recommended to leave some distance among the zones.

Adjust the value or turn on the below functions:

Item	Description		
Tracking Sensitivity	Drag the slider to adjust the sensitivity of the tracking function.		
Tracking Point	<ol> <li>Select a preset number from the drop-down list (Preset 10 ~ 13).</li> <li>Use the directional buttons,  and  to move the camera to the desired position.</li> <li>Click Save to save the position to the selected preset number. A preset thumbnail will be displayed in the preview window below.</li> </ol>		
Time of Return to Tracking Point	Set the idle time (sec.) for the camera to return to the <b>Tracking Point</b> . Slide the bar to adjust the value.		
People Size	Select to track the presenter in <b>Full Body</b> (entire body) or <b>Upper Body</b> (up to 60% of body) while tracking.		
Effective Tracking Area	Set up a tracking area (optional). When <b>Effective Tracking</b> <b>Area</b> function is on, the camera only tracks around the selected area. Check the box to turn on the function and then click <b>Set</b> , a red frame appears in the preview window. Drag the upper-left or the lower-right corner of the red frame to adjust the tracking area.		

	When Auto Zoom is off, the camera stops zooming in/out
Auto Zoom	automatically but keep the zoom size based on the preset
	point selected from the drop-down list below.
Auto Tilt	Check the box to turn on the Auto Tilt function.

•

## Gesture

The Gesture Control allows you to control certain camera functions with hand gestures. Connect your device to the screen with an HDMI cable.

#### To perform the gesture control function:

- 1. Turn off the Tracking Mode first.
- 2. Ensure the camera has been set up at 1X zoom ratio and the distance between the presenter and the camera is 15ft.
- 3. On the Gesture Control drop-down list, select an option to turn on the gesture control function.
  - Off: Select to turn off the gesture control function. When Auto Tracking is off, the camera will automatically return to the preset position you choose.
  - **Tracking:** Select to turn on the gesture control functions in the Tracking mode. Gesture functions include turning on or off Auto Tracking and switching people size between full and upper body.
  - **PTZ:** Select to turn on the gesture control functions in the PTZ mode. Gesture functions include zoom in/out and pan/tilt control.
  - Tracking+PTZ: Select to turn on the gesture control functions both in the Tracking and PTZ mode.
- 4. When the camera recognize the gestures, the LED indicator will blink purple and the system will activate the corresponding functions.

Gesture	Description
	Auto Tracking enable / Switch Presenter Raise your hand beside your face (with an open hand) for more than 3 seconds to activate the Auto Tracking. Instruct camera to track the person that holds up beside his/her face (only enabled when Auto Tracking is on).
₩	Auto Tracking disable/ Zoom out Make a fist beside your face to disable Auto Tracking while it's on; otherwise perform zoom out.
₩	Upper/Full Body Switch Shows four fingers beside your face to switch upper or full body size.
	Zoom In Shows two fingers beside your face and put down your hand to stop zoom in.
¢₩→	<b>Pan/Tilt</b> Shows five fingers beside your shoulder and move camera to desired position. Make a fist to stop camera movement.

# NDI

You can activate the NDI function using this page. Camera firmware version v31 and later supports NDI function.

<b>AV</b> er	Video Bandwidth		
Live View			
Camera Settings	Stream Video Output	Framerate Encoding Type	
Video & Audio	1920x1080 ¥	60 H264 H265

		255.255.255.0	
	Multicast Server Address	Multicast TTL	
	239.255.0.0	10 Confirm Cancel	

#### To set up the NDI function:

This camera is compatible with **NDI** | **HX3** of NewTek, Inc. To use **NDI** | **HX3**, you are required to purchase the license key from the URL of NewTek, Inc.

https://www.newtek.com/ndihx/products/upgrade/

#### To activate the NDI license key:

- 1. Ensure the camera has been connected to the Internet for NDI License Activation.
- 2. Check whether camera firmware version is v31 or later to support the NDI function.
- 3. On the camera Web page of **NDI**, click the **NDI Activate Function** to enter the license key. When finished, click **Activate**. A message pops up for camera reboot. Click **OK** to reboot the camera.

Enter a key code to activate ND	I	×
aabbcccccccccddddddddd	Activate	

 If success, go to Video & Audio > Video Mode, you will see NDI option on the drop-down list. Select NDI to turn on the NDI function. Please refer to Video Mode in <<u>Video & Audio</u>>.
 [Notes] When you turn on NDI, the camera don't support other video output source except HDMI/SDI. Configure the below settings and then click **Confirm**.

Item	Description				
Local Device Name	Enter a name of the camera to be shown within NDI devices. For best results, name all AVer cameras the same Local Device Name. e.g. PTZ Cameras or Tracking Cameras.				
	Enter a channel name for the camera. The default camera name is TR335N. The supported characters are:				
Device Channel (Camera	<ul> <li>Numeric characters: 0123456789</li> <li>Alphabetic characters: ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz</li> <li>Symbols: ! @ % ^ , . / : + ? []{}~</li> </ul>				
Receive Group	Enter a name of the receive group. The Receive Group allows you to limit which users on your LAN can see the NDI source. The Receive Group is recommended to remain <b>Public</b> . Once the Receive Group is changed, you will need to join the Receive Group through NDI® Access Manager.				
Reliable UDP	Select the checkbox to turn on the UDP protocol.				
Discovery Server	Select the checkbox to turn on <b>Discovery Server</b> . Enter the IP address in the <b>Discovery Server Address</b> column.				
Multicast Server	Select the checkbox to turn on <b>Multicast Server</b> . Enter the related info in the <b>Multicast Server Mask</b> and <b>Multicast Server Address</b> columns. You can use the <b>Multicast TTL</b> to adjust the Multicast Time-To-Live interval.

#### Description

To upgrade the firmware: 1. Download the newest firmware from https://www.aver.com/Download-Center/professional-ptzcamera Upgrade firmware 2. On the Web page, go to System > Upgrade firmware. 3. Click **Choose File** to select the firmware. 4. Click **Upgrade** to start upgrading the firmware. 5. Refresh the browser after the upgrade process is complete. Click Reset To Factory Default to clear all values and reset the Factory Default camera back to factory default settings. Camera Information Displays the camera information. The default Login Name and Login Password are 1/1. To change Login the login ID and password, enter the new Login Name and Login Password. When finished, click Change. Select a system language from the drop-down list. Language Click Reboot to reset the setting. Click to turn on the Network Time Protocol and select a Time Zone from the drop-down list to automatically synchronize date Set Date/Time and time. You can also turn off the NTP and enter date and time manually.

Power Schedule	Click to schedule time for powering on/off and Auto Reboot.				
Syslog	Turn on Syslog to receive technical supports. Enter the <b>IP Address</b> and <b>Port</b> of the receiving device for debug and problem analysis.				
Status OSD	Turn on or off status info on the live view, including operating the Preset (save preset, call preset and cancel preset), Zoom or Tracking functions.				
Setting	Click <b>Import Setting</b> to import camera configurations. Click <b>Export Setting</b> to export camera configurations.				
Status Live View	Click to turn on or off status live view.				
Power Up to Preset	Select a pre-configured preset position from the drop-down list, the camera will move to the preset position when powered up.				
Power Off to Preset	Select a pre-configured preset position from the drop-down list, the camera will move to the preset position when powered off.				
Power Off Completely	<ul> <li>On: The camera will enter Low Power mode when sleeping and will take more time to wake up and reboot.</li> <li>Off: To disable the setting above.</li> </ul>				
VISCA Customized Function	Configure the settings and then click <b>OK</b> .				
Sleep to Preset	Select a pre-configured preset point for the camera to move to when enter the <b>Sleep mode</b> . To turn off <b>Sleep mode</b> , select <b>Off</b> from the drop-down list.				
Sleep Timer	Set up a duration for the sleep timer. When there is no UVC connection and timer is up, the camera will enter the sleep mode. To perform this function, ensure to select <b>ZOOM</b> or <b>Teams</b> in the <b>Video &amp; Audio &gt; Theme Mode</b> setup field.				
Help Improving AVer Camera	Select from the drop-down list to set if you allow the providing of anonymous usage data.				
LED Indicator Brightness	Drag the slider to adjust the brightness value.
